```java
public class Solution {
    public int removeElement(int[] nums, int val) {
        int size = 0;
        for (int i = 0; i < nums.length; i++){
            if (nums[i] != val){
                nums[size++] = nums[i];
            }
        }
        return size;
    }
}
```
